

EXECUTIVE READOUT & AUDIT

ATP Energy OMS Migration Audit

Financial Reconciliation & Operational Performance Analysis for C-Level Leadership

Prepared by:

Ing. Dariela Castro Polo

Focus Account:

**NorthStar Industrial Group (\$5.1M
ACV)**

Period Audited:

**Q3 2023 – Q1 2025 (PRE vs
POST)**

Data Pipeline & Interactive Dashboard

To ensure complete rigor, auditability, and speed with the provided dataset, the entire raw order log across PRE and POST migration eras was transformed and loaded into a cloud database hosted on AWS Aurora SQL.

-  **AWS Aurora SQL Database Host:** Houses all 4,156 raw transaction logs with optimized indexing for PRE and POST schema reconciliation.
-  **Interactive Streamlit Dashboard:** A dedicated, custom analytics dashboard was built directly on top of Streamlit, powering every metric, run-rate calculation, and variance calculation in this deck.
-  **100% Metric Traceability:** All C-Level findings—from duplicate order filters to rate discrepancy multipliers—are fully verifiable in real time via Streamlit.

⚠️ Data Integrity & Duplicate Orders Impact Analysis

Comparación entre el dataset original (con duplicados) y el dataset deduplicado de trabajo.

Duplicate Rows Removed

32

⬆️ 32 Orders Affected

Prevented Phantom Revenue

\$14,684.26

⬆️ 0.71% Distortion Avoided

Prevented Phantom Volume

72,426 units

⬆️ Overstated Demand Avoided

Clean Dataset Size

4,124 rows

⬆️ From 4,156 Raw Rows

1. Business Impact: Raw Data vs Clean Data

Metric	Raw Data (ords_raw)	Clean Data (Working)	Risk / Overstatement
Total Records	4,156	4,124	+32 extra rows
Billed Revenue (\$)	\$2,097,386.91	\$2,082,702.66	+\$14,684.26

2. Duplicate Records Detected in Raw File

	order_id	customer_id	order_date	rate_category	qty_ordered	billed_a
0	ORD-100403	2449	2024-07-25 00:00:00	GAS-FIRM	2185.11	108
1	ORD-100403	2449	2024-07-25 00:00:00	GAS-FIRM	2185.11	94

Executive Summary & Key Verdicts

CTO Claim Assessment

PARTIALLY VALIDATED

"The new OMS improved fulfillment tracking."

- Operational fulfillment increased by **+4.9%** post-migration (from 84.2% to 89.1%).
- Order visibility and completion tracking improved significantly in POST system.
- *Caveat:* OMS migration did not create the billing discrepancy, but it failed to correct legacy rate calculation bugs.

CFO Claim Assessment

REFUTED & RECONCILED

"POST OMS broke everything; data is useless."

- **Fact:** Rate discrepancies (~1.35% overcharge) existed in the **PRE system** prior to migration.
- POST system inherited a 1.46% overcharge rate, resulting in **\$28,415.38** total net overcharge across 21 months.
- Data IS reliable once deduplicated (32 rows removed) and rate logic patched.

✓ Bottom-Line Recommendation:

Patch the contract rate engine prior to the next billing cycle and issue a **\$28,415.38 credit memo** to NorthStar Industrial Group to preserve the \$5.1M annual contract.

Data Quality Audit & Deduplication

Duplicate Detection

Identified **32 exact duplicate order records** in the raw dataset (0.77% of raw volume).

- Raw count: 4,156 orders
- Clean count: **4,124 orders**

Phantom Distortion

Removing duplicates prevented significant reporting distortion:

- **\$14,684.26** in phantom revenue avoided
- **72,426 units** in fake demand eliminated

Null & Schema Profiling

Profiled 3,018 PRE vs 1,105 POST clean records:

- Null delivered Qty: 7.26% PRE vs 7.95% POST
- Standardized date schemas and regional tags across migration boundary.

\$14,684.26

PHANTOM OVERCHARGE REMOVED

NORTHSTAR SHARE OF ENTERPRISE VOL

Operational Fulfillment Analysis

Audit of 10.2M total ordered units vs 8.16M delivered units confirms operational improvements

post-migration:

PRE-Migration (16 Mos)

84.2% (5.88M / 7.45M Delivered)

POST-Migration (6 Mos)

89.1% (2.28M / 2.75M Delivered)

Combined Total Audit

85.5% Overall Fulfillment Rate

+4.9% Fulfillment Gain

Delivery completion rates improved by nearly 5 percentage points in POST OMS, validating CTO's stance on fulfillment performance.

Volume Delivered

2,284,383 units delivered POST-migration across 1,105 fulfilled order batches for NorthStar Industrial.

Financial & Billing Discrepancy

Systematic audit reveals that rate overcharges are present across both legacy and new platforms:

System Era	Billed Amount (\$)	Contracted (\$)	Net Overcharge (\$)	Overcharge %	Monthly Run-Rate
PRE-Migration (16 Mos)	\$1,499,946.34	\$1,479,904.27	+\$20,042.07	+ +1.35%	\$93,746.65 / mo
POST-Migration (6 Mos)	\$581,658.45	\$573,285.13	+\$8,373.32	+ +1.46%	\$96,943.07 / mo
Total Audited (22 Mos)	\$2,081,604.78	\$2,053,189.40	+\$28,415.38	+ +1.38% NET	+\$1,395.55 / mo Leakage

Billed Rate Discrepancy
Formula:

$$\text{Discrepancy}_{\text{Total}} = \sum \text{Billed Rate}_i - \text{Contracted Rate}_i \times \text{Qty Delivered}_i$$

CTO Response: Operational Verdict

Addressing CTO Stance

"New OMS is an upgrade; fulfillment improved; nothing broke in October."

- ✓ **Validated:** Fulfillment rate increased from 84.2% (PRE) to 89.1% (POST), proving operational delivery gains.
- ✓ **Validated:** Order tracking schema in POST OMS captures granular fulfillment statuses previously unrecorded.
- ✓ **Correction Needed:** The migration failed to validate rate calculation formulas against client contracts during ETL transfer.

Operational Volume & Delivery Performance Summary

Total Dataset

Total Ordered
10,197,015 units

Total Delivered
8,159,686 units

Avg Fulfillment Rate
85.5%

PRE-Migration (16 Mos)

PRE Ordered
7,446,020 units

PRE Delivered
5,875,302 units

PRE Fulfillment Rate
84.2%

POST-Migration (6 Mos)

POST Ordered
2,750,995 units

POST Delivered
2,284,383 units

POST Fulfillment Rate
89.1%

↑ +4.9% vs PRE

1. Monthly Fulfillment Rate & Delivery Gap Trend

Monthly Fulfillment Rate Trend (%)

2. Order Status Distribution Relative Comparison (100% Stacked)

Order Status Mix (PRE vs POST)

CFO Response: Financial Verdict

Addressing CFO Stance

"Cannot stand behind POST system; overcharges occurred after migration."

- **Fact Check:** POST system didn't introduce the rate discrepancy. PRE system already contained a 1.35% overcharge bug (\$20.0K overcharge pre-migration).
- **Quantified Overcharge:** Total exact refund owed to NorthStar is **\$28,415.38** (\$20,042 PRE + \$8,373 POST).
- **Verdict:** Post-deduplication data IS reliable and audit-ready once rate multipliers are aligned with contract tables.

Billing Reconciliation & Rate Discrepancies

Total Dataset

Total Billed
\$2,081,604.78

Expected Contracted
\$2,053,189.40

Net Discrepancy
\$28,415.38
↑ 1.38% vs Contracted

PRE-Migration (16 Mos)

PRE Billed
\$1,499,946.34

PRE Contracted
\$1,479,904.27

PRE Discrepancy
\$20,042.07
↑ 1.35% vs Contracted

POST-Migration (6 Mos)

POST Billed
\$581,658.45

POST Contracted
\$573,285.13

POST Discrepancy
\$8,373.32
↑ 1.46% vs Contracted

Monthly Run-rate: \$93,746.65/mo

Monthly Run-rate: \$96,943.07/mo (+3,196.43 vs PRE)

🔗 **Annualized Run-Rate Leakage:** At the current POST-migration discrepancy rate, unaddressed billing variances project an annual revenue leakage of **\$16,746.63/year** (~\$1,395.55/month).

1. Billed vs. Contracted Revenue Trend (\$)

Discrepancy (%) vs Contracted by Category

| Pre-Billing Action Plan

1. Deploy Hotfix to OMS Billing Engine (Immediate)

Update OMS calculation scripts to strictly reference `contracted_rate` instead of legacy tariff multipliers. Verify rate parity for ELEC and GAS line items.

2. Issue \$28,415.38 Credit Adjustment Memo to NorthStar

Provide full audit transparency to NorthStar executive team showing \$20,042.07 (PRE) and \$8,373.31 (POST) credit reconciliation ahead of formal contract review deadline.

3. Implement Pre-Invoicing Reconciliation Gate

Enforce automated pre-billing checks that flag any invoice where `billed_amount != contracted_rate * delivered_qty` prior to dispatch.

Long-Term Billing Governance

Unified Master Schema

Establish strict data contracts across PRE and POST OMS data pipelines, standardizing date formats (ISO-8601), status ENUMs, and regional codes.

Contract Sync API

Integrate OMS directly with Salesforce CRM/Contract Repository to dynamically fetch locked contract rates, eliminating manual overrides.

Anchor Care SLAs

Establish a dedicated FinOps audit protocol for top anchor clients (\$5M+ ACV) with 5-day pre-billing sign-offs by finance leads.

AI Use Cases for Quality Control

✓ 1. Automated Anomaly & Rate Variance Detector:

Real-time ML model evaluating order rate deviations and volume anomalies during ingestion, automatically isolating non-compliant invoices.

✓ 2. Smart Deduplication & Schema Harmonizer:

NLP and fuzzy-matching model that identifies duplicate order submissions and automatically maps legacy formats during future system integrations.

✓ 3. Predictive Fulfillment & Dispute Risk Scoring:

Predictive model alerting account managers when partial deliveries or delivery failures exceed tolerance thresholds before billing generation.

Executive Q&A & Discussion

Standing Behind the Data: Defending Operational & Financial Audit Findings

☰ Summary of Key Actions Before Next Billing Cycle:

1. Execute \$28,415.38 credit memo for NorthStar Industrial Group (\$20.0K PRE + \$8.37K POST).
2. Deploy hotfix to align OMS billing logic with contracted rate schedules.
3. Establish pre-billing gate preventing phantom revenue or duplicate order propagation.
